EDUCATION

Madhav Institute of Technology and Science, Gwalior
B.Tech in Electronics Engineering

2023 – 2027
CGPA: 7.2

SKILLS

- **Languages:** Python, SQL
- **Backend:** FastAPI, RESTful API Development
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming
- **Machine Learning:** Supervised & Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation
- **Deep Learning and NLP (Conceptual):** Neural Networks, Transformers, Tokenization, Embeddings, Attention Mechanism, NLP Fundamentals
- **Libraries/Tools:** NumPy, Pandas, Matplotlib, Scikit-learn, Streamlit
- **Version Control:** Git, GitHub
- **AI Tools & LLM Stack:** OpenAI API, HuggingFace, Groq/Whisper, Anthropic Claude, LangChain, Cursor IDE
- **Tools:** MySQL, Jupyter Notebook, VS Code

PROJECTS

AI Mock Interview Platform | React, FastAPI, Python, Monaco Editor, Groq API, Whisper, PostgreSQL, Neon [Live Demo] | [GitHub]

- Architected a full-stack AI mock interview platform covering the complete interview workflow — resume ingestion, LLM-powered question generation using Groq API, AI-based evaluation, and structured feedback reporting backed by Neon PostgreSQL.
- Engineered a modular FastAPI backend with pipelines for resume parsing, real-time speech transcription using Groq Whisper, per-question timer enforcement, and automated scoring across technical, coding, and voice interview rounds.
- Integrated Monaco Editor with multi-language coding support and timer-based editor locking to simulate real interview constraints, alongside voice interaction pipelines using Groq Whisper (speech-to-text) and Web Speech API (text-to-speech).
- Built a responsive React frontend with AI-assisted development, incorporating multi-modal answer inputs, live transcription controls (replace/extend), and session state management across coding, technical, and voice interview flows.
- Deployed the application live using Render and Vercel, with source code managed using GitHub.

Student Marks Predictor | Python, Scikit-learn, Pandas, Matplotlib, Streamlit [GitHub]

- Built a regression model to predict student scores using study hours, sleep, and attendance data.
- Evaluated performance using MAE, MSE, RMSE, and R^2 metrics.
- Visualized trends and model performance using Matplotlib.
- Created an interactive web interface for predictions.

EXPERIENCE

Summer Internship Program (Power BI)

Dec 2024

- Performed data cleaning and transformation for analysis.
- Built interactive dashboards using Power BI.
- Generated insights using charts, filters, and reports.

ACHIEVEMENTS

- Solved 100+ DSA Questions on LeetCode and GeeksforGeeks
- Certified in Generative AI, LLM and Responsible AI — Google Cloud Skills
- Earned Advanced SQL Badge and Python (Basic) Certificate from HackerRank.
- Finalist among 400+ teams in Frontend Battle 2K26 at MITS Gwalior.
- Completed a Generative AI Masterclass focused on prompt engineering and AI tools.
