EDUCATION

Madhav Institute of Technology and Science, Gwalior
B.Tech in Electronics Engineering

2023 – 2027
CGPA: 7.2

SKILLS

- **AI & LLM:** LangChain, RAG Pipelines, OpenAI API, Groq/Whisper, Anthropic Claude, HuggingFace, ChromaDB
- **Backend:** Python, FastAPI, RESTful APIs, SQL
- **ML & Deep Learning:** Supervised/Unsupervised Learning, Neural Networks, Transformers, Embeddings, Attention Mechanism
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** PostgreSQL, MySQL, ChromaDB
- **Tools & Platforms:** Git, GitHub, Jupyter, VS Code, Cursor IDE

PROJECTS

AI Mock Interview Platform | React, FastAPI, Python, Monaco Editor, Groq API, Whisper, PostgreSQL, Neon
[Live Demo] | [GitHub]

- Shipped a full-stack AI interview platform covering resume ingestion, LLM-powered question generation via Groq API, AI-based evaluation, and structured feedback reports backed by Neon PostgreSQL.
- Built a modular FastAPI backend handling resume parsing, real-time Groq Whisper transcription, per-question timer enforcement, and auto-scoring across coding, technical, and voice interview rounds.
- Simulated real interview constraints using Monaco Editor with multi-language support and hard timer-based locking, alongside voice pipelines using Groq Whisper (STT) and Web Speech API (TTS).
- Delivered a multi-modal React frontend (built with AI assistance) supporting live transcription controls, multi-modal answer inputs, and persistent session state across all three interview modes.
- Deployed live on Render and Vercel with source code managed on GitHub.

AI Research Assistant | LangChain, FastAPI, Streamlit, ChromaDB, OpenAI | [GitHub]

- Built a RAG pipeline over uploaded PDFs using semantic chunking, OpenAI embeddings, and ChromaDB vector search for accurate contextual document Q&A.
- Decoupled AI logic from frontend by designing separate FastAPI endpoints for uploads and chat, making the backend independently usable as a REST API.
- Composed retrieval workflows using LangChain LCEL primitives — RunnableParallel, RunnablePassthrough, prompt templates, and output parsers, keeping logic modular and easy to extend.
- Shipped an interactive Streamlit frontend with persistent chat history and session-state optimization to minimize redundant API calls.
- Source code available on GitHub, structured for easy local setup and extension.

EXPERIENCE

Summer Internship Program (Power BI)

Dec 2024

- Performed data cleaning and transformation for analysis.
- Built interactive dashboards using Power BI.
- Generated insights using charts, filters, and reports.

ACHIEVEMENTS

- Solved 100+ DSA Questions on LeetCode and GeeksforGeeks
- Certified in Generative AI, LLM and Responsible AI — Google Cloud Skills
- Earned Advanced SQL Badge and Python (Basic) Certificate from HackerRank.
- Finalist among 400+ teams in Frontend Battle 2K26 at MITS Gwalior.
- Completed a Generative AI Masterclass focused on prompt engineering and AI tools.
